

## **ABTA publication Post Pandemic Recovery - A guide to assist destinations and the travel industry**

ABTA has produced a publication called **Post Pandemic Recovery – A guide to assist destinations and the travel industry** designed for use by ABTA Members and associated suppliers in the destination supply chain.

The guide is not intended to replace destination local government or public health authority guidance, but has been designed to complement the **ABTA Tourism Accommodation Health and Safety Technical Guide** and other ABTA publications and guidance. Users of the guide will be able to identify key operational, service and safety factors that should be considered and introduced in accordance with the local authorities and local public health requirements before they recommence operations and introduce processes that make sure these factors are maintained once their operations resume. Topics include:

- The customer journey
- Management responsibility
- Risk assessment
- Refinement of operational and service provisions and procedures
- Health, safety and security
- Communication
- Supply chain management
- Prevention of spread of infection

As Travelife Members, ABTA wanted to ensure you have access to the publication, that is available in a secure area of the ABTA website. Please follow the instructions below to access the guide.

### **How to access the guide**

Please click on the red link below and you will be asked to sign into the ABTA website. Please follow the registration process, selecting “I have an interest in ABTA and the UK Travel Industry”. Once you have registered, the document will be available to download.
